

November 8,2006

My name is Carolyn and I live in Holyoke, MA. I wore glasses since I was nine years old and contact lenses (hard and gas-permeable) for over thirty five years.

I decided to pursue laser vision correction after my daughter, Beth, had successful PRK performed in your Glastonbury, CT. office by Dr. Steven Stetson. Naturally I needed to have everything the same - the office, the doctor and yes, it was determined PRK was best for me!

My surgery was performed on September 13th and almost immediately everything looked so "crisp" and clear. The discomfort was minimal. The staff at Diamond Vision was cautious, competent and caring.

I am enjoying my "new eyes". This FaU was especially beautiful to me; driving is much easier both day and mgN. I am looking forward to seeing the brightness and colors of the Holidays!

Thank you,

Carolyn
